Oluwayomi Marvellous

Operations & Technology Lead | Full-Stack Developer | AI Automation Specialist

Lagos, Nigeria (open to remote and hybrid) · oladejimarvel@gmail.com · +234 913 056 3103

Portfolio · GitHub · LinkedIn

Professional Summary

Operations and technology lead who builds the systems a business runs on. Three years across IT support, full-stack web development and AI automation, from a 200+ user enterprise helpdesk at Nigerian Breweries to running operations and tech for a growing Lagos brand.

At YSIDRA I built the company's internal operations platform, connected it to HubSpot CRM, and launched the business as a ChatGPT app through a custom MCP server. I also teach AI automation (n8n, Zapier, Make, AI agents) at TechRush. Strongest where people, process and code meet: I find the manual work, automate it, and get the team to actually use it.

Core Skills

- **AI & Automation:** n8n, Zapier, Make, Power Automate, Microsoft Copilot Studio, AI agents and chatbots, MCP servers, LLM APIs, webhooks
- **Web Development:** JavaScript, TypeScript, React, Next.js, Node.js, Express, Tailwind CSS, HTML5, CSS3
- **Data & Platforms:** Supabase, Firebase, MongoDB, Vercel, Netlify, Git/GitHub
- **Business Systems:** HubSpot CRM, Google Workspace admin, Microsoft 365, SharePoint, Teams, Cloudflare, domain and DNS management
- **Operations & Leadership:** process design, internal tooling, team KPIs and accountability, hiring and onboarding, vendor coordination, reporting to leadership
- **IT Support:** end-user support, asset management, access provisioning, network troubleshooting

Professional Experience

Operations & Technology Lead — YSIDRA (Ysidra Creatives), Lagos

June 2026 – Present

- Built and run YSIDRA's internal operations platform (React, Vercel) covering tasks, production tracking, finance (salaries, operating costs, incoming payments) and staff accountability; every team member now works from one system instead of WhatsApp threads.
- Integrated HubSpot CRM with operations and added lead-channel tracking so every deal is attributed to its source.
- Launched YSIDRA as a ChatGPT app through a custom MCP server that generates quotes for custom notebooks and corporate gifts, opening a new AI-driven sales channel.
- Set up two-way Google Calendar sync between the platform and leadership calendars, so deadlines and production dates stay in one place.
- Administer Google Workspace and the company domain; moving staff from personal Gmail to branded @ysidra.com accounts at minimal cost.
- Maintain the company website (ysidra.com) and set up Cloudflare Web Analytics with a weekly performance report to the CEO.
- Lead hiring, onboarding and performance: recruited client success, content and logistics roles, wrote team rules and KPIs, and manage the print vendor relationship.

AI Automation Tutor — TechRush

Part-time · 2026 – Present

- Teach AI automation to cohorts of career-switchers and professionals using n8n, Zapier, Make and AI agents.
- Guide learners through hands-on builds: webhooks, lead capture, email sequences and multi-app workflows that solve real business problems.
- Review projects, debug broken workflows with students, and coach them to troubleshoot independently.

IT Support & Web Developer — Diamond Star Ports and Terminals

April 2026 – August 2026

- Implemented frontend and backend features on internal web systems alongside the development team.
- Improved the usability and consistency of internal interfaces used by port staff.
- Provided day-to-day IT support and fed user issues back into system design.

IT Support Intern — Nigerian Breweries Plc

January 2025 – March 2026

- Supported 200+ users across hardware, software and access issues, cutting downtime by 50%.
- Built Spin to Win, a web system that replaced the manual, paper-based ICT scrap sale with a fair digital selection process and a clear audit trail.
- Developed an IT support chatbot that resolves about 70% of routine tickets without an engineer.
- Managed asset deployment, diagnostics and access provisioning.

Frontend Developer & Junior Automation Specialist — Bitoshi Inc.

January 2024 – December 2024

- Automated the recruitment workflow, reducing time-to-hire by 40%.
- Automated internal workflows, saving the team about 15 hours a week.
- Built frontend interfaces for internal automation systems.

Customer Support & Web Designer — Cholatrek Technologies Ltd

June 2023 – December 2023

- Built AI chatbots that resolved 60% of customer inquiries.
- Implemented CRM automation that halved response times.

Selected Projects

- **YSIDRA Operations Platform** — company-wide ops system for tasks, production, finance and team accountability, with HubSpot and Google Calendar integrations. React, Vercel. (Internal; demo on request.)
- **YSIDRA ChatGPT App** — MCP server that lets ChatGPT users get instant quotes for custom notebooks and gifts, with leads flowing into HubSpot.
- Spin to Win: ICT Procurement — secure web app that replaced a paper process for selling retired IT equipment with fair, random digital selection.
- IT Incident Management System — raise incidents, assign tickets, track resolution and manage IT assets across teams.
- Deployment Scanner — pre-deployment security scanner for Kubernetes, Terraform, Docker and CI/CD configs, with LLM-assisted risk explanations.
- AI IT Support Chatbot — helpdesk bot that answers routine IT questions and logs queries centrally.
- Spectra Skins — e-commerce store for custom laptop skins with listings, cart and checkout.

Education

B.Tech Computer Science — Federal University of Technology, Akure (2018 – 2023)

Certifications

Microsoft Power Platform Fundamentals · CompTIA Network+ · Zapier Certified Expert · n8n Contributor
